Automobile Stolen.

Another theft of a motor car from a localite occurred Saturday night. The car belonging to Mr Henry Enders, who lives on Second avenue west, had been left out in front of his residence and, by a slight oversight, the key had been left in the car. About midnight a resident of Stony Plain, on returning from the City, noticed a car ditched east of Spruce Grove, on the Jasper Highway. He identified it as the Enders car, and notified Mr Enders when he got to Stony. A truck was sent out and brought the car to a local garage.

It is thought to have been the work of one man, as the car had evidently been pushed by hand down the slight incline from where it had been parked, and the spools indicate it had been wobbling somewhat.

It is noted that when Mr Ducholke's sedan was stolen from a local garage a short time ago the thief had driven the car right out of the garage and never stopped to close the doors, leaving the other cars at the mercy of the wintry blasts.

Help for Farmers.

There does not appear, as yet, to be any demand from farmers of the district for help during the seeding season, now at hand. Up to the present, the wet ground, which in some localities still has a blanket of snow on it, accounts for the delay in starting work.

A number of farmers already have men on their farms which they will use for spring work. Under the Dominion-Provincial governments plan for assisting single homeless jobless in the last winter, 3000 men were placed on farms. This plan enabled the workman to get \$5 a month from the Government and his food, clothing and shelter from the farmer and the farmer, in return, received a stipulated number of hours' work a day. This plan is effective until April 30.

On the Highway.

The ban against trucks and trailers using the Highway still continues, with the cars which are using the thoroughfare having difficulty getting thru the soft spots. A few miles east of the Grove, in the low places, much difficulty was experienced, up to the present, practically every car being "hung up" when it struck the mud. For a day or two there was a man with a team of horses to assist motorists when stuck in front of the Pinchbeck or Gibson farms.

Heard on the Bus.

The Queen Mary

Disappointment is probably in store for millions in the British Empire who have conceived the impression that the first trip of the Cunard-White Star's super-liner, the Queen Mary, scheduled for May 27, is a world sporting event of the first magnitude with the blue ribbon of the Atlantic for speed as the stakes.

The speed record for the Atlantic was held for the British for 22 years by the Cunard Steamship Company's Mauretania until August, 1929, when the title passed to the Rex, flying the flag of Italy, and has not since been recovered by any vessel carrying the Union Jack.

Millions have been led to believe that the Queen Mary is expected to win back the speed supremacy of the North Atlantic for Great Britain and as a result of the great amount of publicity given to this vessel during the course of her construction and on the occasion of her launching at Clydebank a few weeks ago they confidently anticipate that this consummation to be achieved by the new boat, but this, according to the London Times, is not the purpose of the construction of this great steamship.

On the contrary, the Times shatters this and other misconceptions of the purpose and mission of the Queen Mary. Not only was she not built to wrest the speed supremacy of the North Atlantic from another country but, we are told, she was not designed to be the most luxurious liner afloat, despite remarks of descriptive material which has been published emphasizing the lavish nature of her appointments and equipment.

"The problem," says the Times, "was not to build a ship so big and so fast as to 'stagger creation'. The problem all along was to build the smallest and slowest ship that could form one half of a weekly service."

Continuing the Times says: "Speed is very expensive; and a ship must be big to pay for it. On the other hand size is also expensive; and there is need for nice calculation. The Queen Mary is not meant to be the biggest and fastest ship afloat. She is not meant to be a 'luxury' ship at all. It has been made perfectly clear that the luxury will be there for those who seek it; but one advantage of great size in a ship is that room can be made for all sorts of people, and the Queen Mary is not for the rich only."

However, if the Queen Mary is not designed to be the largest ship afloat or the fastest boat on the seven seas or even the most luxurious, she has claims to distinction which make her an impressive monument to the brains responsible for her creation, exemplified in the words stability, strength and safety and these attributes have been achieved without undue sacrifice of size, speed and lavishness.

On the contrary, the Queen Mary is of noble proportions and embodies the last word in naval architecture, marine engineering and scientific research.

Every conceivable device has been adopted to justify the claim made for the Queen Mary that she is the safest ship afloat and that passengers aboard her will be safer than in their own homes. To quote a recent issue of Pearson's Weekly she is "so well equipped with scientific instruments that it will be literally possible, with a little adjustment, to send her from Southampton to New York without a man aboard," and, "she will be able to steam through impenetrable fog at 40 miles per hour, automatically steered and protected from collision with ships and objects."

These devices include a "radio searchlight" with which the Normandie is also fitted, a continuous beam of ultra-short radio waves which sweep the horizon ahead of the bows of the advancing vessel and record obstructions on a sensitive receiver.

New Uniform Calendar Plan

Provides International Holiday And Five Business Holidays Yearly

With a suggestion that it be put into effect on January 1, 1938, Rev. Father Jacob Wilhelm of Regina has drafted a reform calendar which provides for the days of the week always falling on the same dates of each month.

Under Father Wilhelm's plan the four quarters of the year are equal with 31 days for the first month of each quarter and 30 days each for the other two months except that 31 days are provided for December to give a total of 365 for the year. An extra day is wedged in between June 30 and July 1 every fourth year to be known as "leap day."

The year will start with January 1 labelled as "international holiday" and January 2 is to be a Sunday with December 31 a Saturday. If the calendar were adopted Good Friday would always fall on April 7 and Easter Monday on April 9.

It is suggested that Saturdays falling on January 1, April 1, July 1 and October 1 be made business holidays, giving with international day on January 1, five business holidays each year. The first four, according to Rev. Father Wilhelm, would be known as rest days when everyone should carry out a review of his debts or profits.

The calendar is designed to offset objections of the Christian churches to the recently announced plan to provide for a year of 13 months containing 28 days each.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Ready to Go

The liver should pour out two pounds of fluid bile into your bowels daily. If this bile is not flowing freely, it causes constipation. It just drops in the bowels. Gas builds up your stomach. You get constipated. Bile poisons go into the body, and you feel sour, sick and the world looks pink.

A mere bowel movement doesn't always get you roused. You're never roused that way on the liver as well. It takes those good, old Carter's Little Liver Pills and makes you pour out bile flowing freely and make you feel the life flow freely. They do the work of a thousand years of laxative and cathartic use. Ask for Carter's Little Liver Pills by name. Satisfactorily refuse any else. See

Patient Revived

Apparently Dead For Some Minutes Is Resuscitated On Operating Table

Another case of a patient who "died" on the operating table, only to be brought back to life again by heart massage and injections of adrenaline, is described in the current issue of the British Medical Journal.

The patient, Ernest Hinley, about 45, of Waterloo, Ashton, is now normal again, but has no memory of having been to the operating theatre.

His heart, said Dr. J. V. Fiddian, stopped without warning and Hinley ceased to breathe. Efforts at resuscitation began immediately and the "usual two or three minutes were wasted in fruitless artificial respiration."

Dr. Fiddian then resorted to cardiac massage, and continued this for two minutes without feeling any spontaneous movement of the heart. He then injected intra-cardiac adrenaline into the ventricle.

"The effect," he writes, "was immediate and almost magical. With each squeeze that followed the heart was felt to be enlarging and suddenly it began to beat wildly."

"It was several minutes more before spontaneous respiration was established, but after that there was no further immediate anxiety."

"The patient was returned to bed with his heart still beating tumultuously, in a manner strongly suggestive of an overdose of adrenaline."

Distribution of Jews

A total world Jewish population of 16,240,000, of whom 5,000,000, or 30 per cent, live in the Americas was reported by the Jewish Scientific Institute. The survey shows the figure had increased 1,800,000 in the last 10 years. More than 10,000,000 Jews, or two-thirds, live in three countries. The United States has 4,450,000, Poland has 3,150,000 and Soviet Russia, 3,080,000.

Argentina is estimated to contain 200,000 square miles of valuable forests.

Building Flying Boats

Imperial Airways To Operate A World-Wide Service

More than 1,000 skilled men are engaged at Rochester, England, in building a fleet of 28 giant flying-boats for operation by Imperial Airways on world-wide services—including the Atlantic.

There are two decks to the new flying boats, lower being for passenger accommodation and the top for crew (two pilots, two stewards and a purser), mails and baggage.

The gross weight of the new ships will be 17½ tons, and they will be powered by four 740-h.p. engines, giving a maximum speed of nearly 200 m.p.h. and a cruising speed of 155 m.p.h. Underneath the pilot's cabin is a comfortable smoking room, and there are two more cabins more than eight feet high with adjustable lounge chairs.

There is daytime accommodation for 24 passengers and for 16 sleeping in bunks by night.

SELECTED RECIPES

CHERRY ROLL

Temperature: 425 degrees F.

Time: 25 minutes.

¾ cup "Crown Brand" Corn Syrup

1 pint jar cherries (canned)

½ cup sugar

1 teaspoon cinnamon

1 cup boiling water

1 tablespoon butter

Tea biscuit butter

Drain cherries and pour juice in a saucepan. Add the water, sugar and "Crown Brand" Corn Syrup. Boil 5 minutes. While the syrup is boiling make an ordinary tea biscuit butter and roll it out in oblong roll. Spread the cherries over the dough; sprinkle with cinnamon, dot with butter and roll up like jelly roll. Place the roll in an oblong pan; pour the hot syrup over it and bake in a hot oven.

Flyers usually find it necessary to use their oxygen apparatus when they reach an altitude of about 18,000 feet.

Seedless watermelons have been grown in horticultural experiments.

Something New in Pictures

Three Dimensional Animated Cartoons To Be Shown

Three dimensional animated cartoons which can be shown with regular movie projection equipment and without use of any gadget by audiences were announced by Max Fleischer, pioneer in the animated cartoon field.

Fleischer declares his invention has passed the experimental stage, and that full length animated cartoons using the third dimension throughout will be released within six months.

Fleischer obtains the third dimensional effect by foreshortening the perspective of the camera to six feet and using a special lens which does not focus directly on the objects photographed.

What this Doctor did for Humanity

As a young man the late Dr. R. V. Fisher practiced medicine in Pennsylvania and was known far and near for his great success in alleviating disease. Finally he moved to Buffalo, N.Y., and put his ready-to-use form, the Clinoid Medical Disc, the well known Clinoid Medical Disc, is made from a formula which Dr. Fisher found more effective when in private practice. It's an alternative extract from native roots.

It helps to cleanse the system, and tends to keep the complexion fresh and clear, aids digestion, acts as a tonic.

Floods And Sun Spots

Are Closely Connected Is Opinion Of Planetarium Director

Floods that have swept the eastern part of North America during the past few weeks are "definitely correlated" with sun spots "and we may expect damp, rainy weather for the next four or five years because these spots are fast reaching a maximum intensity," Dr. Clyde Fisher, director of the Hayden Planetarium and fellow of the Royal Astronomical Society, said in a lecture at Providence, Rhode Island.

No wonder Purity Flour is a favorite for bread. Its richness in nourishing gluten is supplied by Western Canada hard Spring wheat. A strong flour that goes farther—economical.

Best for all your Baking

Trees Recommended As Suitable For Western Climatic Conditions

Climatic conditions generally are not favourable to tree-growth on the Canadian prairies, particularly in the semi-arid area. The prairie tree-planter has to contend not only with these unfavourable conditions but also with competition from the natural groundcover. Experience has shown, however, says Norman M. Ross, superintendent of the Dominion Forest Nursery Station at Indian Head, Saskatchewan, and Chief of the Dominion Tree-Planting Division, that even in the driest areas trees suitable for shelter-belt, and also for the production of fuel and fence posts, can be grown if proper methods are adopted.

First of all, the soil must be thoroughly prepared in order to eradicate completely the native grasses and other perennials, and to store up a reserve of moisture to give the young plantation a reasonable start. This usually requires two seasons. In the first season the soil is broken a few inches deep and then thoroughly worked. One season is sufficient to kill all the native plants. The following year, the land to be planted is deeply summer-fallowed to open up the soil for the roots and to conserve moisture.

The next step is to select varieties that have proved hardy and capable of withstanding drought when once established. The list of varieties suitable for shelterbelts and for propagating in large numbers at reasonable expense, is very limited. It consists of: Caragana (Caragana arborea), a leguminous shrub of Russian origin, exceptionally hardy and drought-resistant, with a dense shrubby growth to a height of about 20 feet; Manitoba Maple (Negundo aceroides), a native tree with a somewhat bushy tendency growing to a height of about 40 feet; Green Ash (Fraxinus lasiocarpa), a native, rather slow growing tree, also very drought-resistant; the American Elm (Ulmus americana), a hardy native tree; White Spruce (Picea canadensis), native; Colorado Spruce (Picea pungens); and Scotch Pine (Pinus sylvestris) of which there are many types, the one most suitable being propagated from seed secured in Finland or central Sweden.

All these varieties can be grown successfully on the average upland prairie soils. In certain districts, usually associated with lighter soils, the water-table may be reasonably close to the surface (from seven to 15 feet), and in these districts many varieties of poplars and willows, in addition to the trees already mentioned, prove very satisfactory.

A Beneficial Exercise

Walking Down Stairs Is Good For Weak Heart

New York City's recent elevator strike probably will take a serious toll for the next six months in hearts damaged by stair-climbing. Dr. J. O. Gieger, San Francisco Health Director, predicted.

Gieger advocates walking down stairs—but not upstairs—as an ideal exercise for persons with cardiac ailments.

Downstairs walking—two or three flights—is beneficial, Gieger said, because even persons with heart trouble require at least some exercise of the muscles and because this form of activity permits it with a minimum of strain on the circulatory system.

Sun Spots And Wet Weather

Floods that have swept the eastern part of North America this spring are "definitely correlated" with sun spots "and we may expect damp, rainy weather for the next four or five years because these spots are fast reaching a maximum intensity," Dr. Clyde Fisher, director of the Hayden Planetarium and fellow of the Royal Astronomical Society, said in a lecture.

In 1934 Canada produced 30,175 electric refrigerators, as compared to 16,449 in 1933. During the same year she imported 1,735 from the United States.

Rideau Hall Staff Busy

Use Spare Time To Help Lady Tweedsmuir's Relief Work

Seven maids have been busy, not only with mops but knitting needles. The seven house-maids at Government House at Ottawa made a knitted patchwork bed-covering and presented it to Lady Tweedsmuir to send with the work from her sewing circle to the destitute areas in the West.

Nellie, Lily, Ruby, Winnie, Louise and Maud, joint workers on the famous quilt, arrived in Canada as part of the vice-regal household. They had been with Their Excellencies some time. Edna, who joined the staff in Ottawa, can tell them all about the need for comforts in outlying Canadian towns.

Down below the white marble staircase at Rideau Hall, more needles have been clicking and flashing. Mrs. Jackson, first lady of the kitchen, has been occupied not only in cooking, but also in knitting a boy's jersey. Little Scottish, Annie Her Excellency's personal maid, has made several pairs of serviceable socks that have found their way into the practical boxes for which the chateausse of Government House is receiving thanks from their frontier towns.

One letter of thanks mentions a small boy who had just received his first pair of completely white breeches with real braces and was wondering around to impress the neighborhood. "Little Doyenne," who arrived in a household unable to provide her with clothes, is now wearing those made by the sewing circle.

The Wedded State

Fewer Married Persons Are Subject To Mental Ills

Two scientists offer results of a study they interpreted as indicating the ranks of married persons include fewer mentally ill individuals than are found in the single, divorced and widow-and-widower classifications.

Dr. James Page of Columbia University and Dr. Carney Landis of the New York Psychiatric Institute presented their findings at a meeting of the New York branch of the American Psychological Association.

They said, however, that "marriage is no vaccine against mental disease."

Analysis of records of admissions from 1920 to 1934 at New York mental hospitals in Massachusetts from 1929 to 1931, and in the entire United States for 1922, they said, disclosed these ratios:

Four times more divorced persons were insane patients than married persons.

Three times as many single persons were listed, compared to married ones.

Widows and widowers numbered double the married group.

Testing New Wheat

Rust Resistant Varieties Will Be Sown This Season

Most promising strains of rust resistant wheats will be multiplied at western experimental farms during the coming growing season. It was announced by the associate grain committee of the national research council.

Members of the committee from eastern and western points were in attendance at the committee meetings in Winnipeg studying reports compiled on last year's surveys of the milling and baking qualities of the rust resistant strains.

Among the most promising strains selected for multiplication this year is Thatcher, an imported variety which has been obtained by a large number of farmers for growing this year. A committee report termed Thatcher "a highly desirable variety."

False carding is a term used by card players, and means the playing of a card meant to deceive the opponents as to the players' holding that suit.

Macadamized Roads

Were Named After John McAdam, Pioneer Road Builder

The civilized world has become familiar with "macadamized" roads, but it is doubtful if many of the millions who use them know the origin of the term. The British Institution of Municipal and County Engineers are taking active steps to commemorate the centenary of the death of that pioneer of roadmaking, John Loudon McAdam, which occurred at Moffat, England, on November 26, 1836.

McAdam was born in 1766, his father being a local landowner and banker in Ayr. At the age of four he joined an uncle in business in New York, and did not return to Scotland until 1783. Thereafter for fifteen years he served as Deputy Lieutenant for the County of Ayr, and devoted much attention to the improvement of the local roads. Subsequently he removed to Paisley, where he was concerned in the victualling of the navy, though he also made a hobby of studying road conditions in that part of England. In 1816 he was appointed surveyor of the Bristol Turnpike Trust, and a year after demonstrated his system of road construction in London. This system was based upon the principle that, with proper drainage, broken stone of suitable size can be laid on the natural subsoil, thus eliminating the expensive stone-paved foundation that had previously been considered necessary.—Toronto Mail and Empire.

A Very Old Industry

Rush-Mat Making Was Once Good Business In England

A tiny wooden hut workshop in a cottage garden at Pavement, near Bedford, England, is the last relic of an industry that once employed the whole village. Soon even that will be closed for lack of work, and 70-year-old George Purser will retire on his old-age pension. George Purser is the last of the rush-matting makers at Pavement.

For three hundred years without a break his family gathered rushes from the River Ouse, plaited them, and made them into horse collars, baskets, chair seats, hassocks, and floor covering. His father employed 12 men and 70 women.

"Now nobody wants rush-matting," Mr. Purser said. "A firm I used to work for used to make 2,000 horse collars a week. Now I doubt if they make 150 a year. We sold thousands of workmen's dinner baskets. After the war men took to haversacks."

An Unusual Job

Over a period of nine years, Judd Ridd-Jack of Toledo, Ohio, has cut the profiles of 1,200,000 Americans. With scissors and paper as tools, he requires only 30 seconds for each silhouette. His work is around the country "snipping" for a living.

Cutwork Makes Linens Alluring

Household Arts by Alice Brooks

Here's Cutwork Without Bars

PATTERN 5490

"Where does Mary get such LOVELY linens?" her friends all ask. If they but knew, Mary embroiders her own to clothe, napkins, dresser scarves and sets this easy, Alice Brooks' way. You, too, will find this lovely cutwork design the richest—and easiest—you've ever embroidered, for it is so worked up quickly. Use a thread that matches or contrasts with your linen and then you won't have just as many compliments as Mary!

In pattern 5490 you will find a transfer pattern of two and two reverse corners 10x12 inches and four motifs 3 1/2x4 inches. Instructions for cutwork; illustrations of all stitches needed; material requirements; color suggestions.

To obtain this pattern send 30 cents in stamps or cash (cash preferred) to Household Arts Dept., Winnipeg Newspaper Union, 370 McDermott Ave., E., Winnipeg.

There is an Alice Brooks pattern book published.

Garden Soil Is Sterilized And Freed Of Weeds By The Use Of Electricity

Soil permanently sterilized—freed of weed seed, destructive insects, bacteria, fungi and plant diseases—by automatically controlled electric cookers.

Vegetables and flowers grown out of season in soil heated by electrical resistance cables and flowers blooming in midwinter as a result of artificial lighting.

Delicate seed made healthy, surface soil ridged of harmful insects and fungi, tree borer and termites destroyed by a new "soft X-ray" and vegetables and flowers grown in water on electric griddles.

Bothersome insects, such as mosquitoes and coding moths, destroyed by light waves too small for the eye to detect, electric flames which destroy mold and decay bacteria in foods and kill injurious bacteria in water, and green vegetables, human food or animal feeds grown within a few hours inside metal cabinets, without soil and without sunlight.

These are some of to-day's and to-morrow's headlines in the march of science and mechanics into farm fields and home gardens, writes Charles Morrow Wilson in "Popular Mechanics."

Most soil teems with enemies to plants and man, weed seed, soil hibernating parasites and fungi. For centuries people have striven to sterilize soils and fight these hosts of unwelcome guests. The primitive defense has been to wait until fall to burn off dead leaves and stalks. More recently there have been attempts to purify the soil with chemicals. But few chemicals are effective in cold soils and sometimes the residues prove harmful.

Some progressive farmers, gardeners and florists are trying to sterilize their soil with electrical heat. They find that heating the soil to 180 degrees for five or six hours not only kills soil bacteria and insect life, but virtually every variety of weed seed, converts unavailable forms of soil nitrogen into available plant foods and develops great quantities of ammonia. This changes to nitrate, which results in more rapid plant growth.

The commercial soil sterilizer consists of a box with one cubic yard capacity, built of eighth-inch boiler plate and provided with a top for loading and a bottom dump for emptying the soil after it has been "cooked." A home-made wooden box properly wired might serve as well. Heat is furnished by fifteen electric heating elements carrying a connected load of five kilowatts placed to give even heat throughout the box and allow free space for removing soil. Elements are connected in upper and lower circuits to allow sterilization of one-half cubic

yard. The cost of sterilizing a cubic yard of soil for a period of six hours at three cents a kilowatt hour is approximately \$1. A cubic yard of fertile soil will all about 2,000 small flower pots, and the saving in weeding alone more than repays sterilization costs.

Winter vegetables such as beets, lettuce, turnips and celery grow well in soil temperatures of from 50 to 60 degrees. "Warm weather" vegetables require a soil temperature of about 70 degrees for best growth.

One gardener has installed a "warming grid" for starting early peppers, tomatoes, cabbage and various other garden vegetables and flowers for transplanting. He built the grid on a bench in a corner of his greenhouse, covered the top of the bench with lead-sheathed wire cable made for resistance heating and placed 3x4-inch boards between the cables to protect them from the weight of soil boxes. Within three weeks he produced sturdy plants for transplanting.

Electricity is taking new roles in the above-ground propagation of plants. Dr. Samuel C. Hildren, director of applied lighting from the Westinghouse Company is developing a means of sterilizing soils with a short-wave or soft X-ray radiation capable of penetrating the soil several inches. When the device is fully developed it is possible the soil of fields, gardens and flower beds can be freed of harmful insects, bacteria, larvae and fungi by use of a portable outfit. The soft X-ray has proved sure death to various animal organisms such as insects beneath the bark of a tree and termites in timber.

Plenty To Choose From

Many Suggestions For King George Memorial Have Been Received

Nearly 100 suggestions for the form of the national memorial to King George have been received by Sir Percy Vincent. Many of them are accompanied by drawings, some well executed, others evidently the work of amateurs. They include the following:

A statue of King George attired as an admiral "steering the ship of state through the troubled waters of his reign."

A statue of King George on the summit of a column "at least 100 feet higher than any building in the British Empire."

A many-storied concrete tower in Hyde park, the ground level to be a motor garage, the first floor a national theatre, the next a cinema, and the highest an observatory. The lord mayors of Sheffield and Birmingham and the mayors of four Derbyshire boroughs are being invited by the mayor of Derby, Alderman E. Clark, to support a proposal that Dovecliff be acquired for the nation as a memorial to the late king.

Gifted With Fine Voices

Pleasure To Listen To Members Of Royal Family

References made by Wickham Steed to King Edward the Seventh's wonderful voice prompted numerous discussions afterwards on the subject of Royal voices. Wickham Steed declared that he had heard King Edward's "big voice" carry 300 yards against a wind. Guests discussed King George's voice, the most famous in the world, and regarded as ideal by the broadcasting authorities. King Edward the Eighth is also gifted with the family voice, clear and carrying, says the London Daily Telegraph. Other fine royal voices are those of Queen Mary, very deep and dignified, the Duchess of York, clear and alpine, and the Duchess of Kent; deep and of such fine expression that it is a pleasure to listen to it.

Smith—"Is your wife economical?"

Jones: "Sometimes. She used only 30 candles on her fortieth birthday cake."

Once you have tasted **Christie's SULTANAS**

you'll appreciate why nearly everybody likes their fresh fruit flavor so much. They are packed full of plump, uncrushed Sultanas and baked to a delicious, delicate crispness. That's why they're so extra good.

Christie's Biscuits
"There's a Christie Biscuit for every taste"

WORLD HAPPENINGS BRIEFLY TOLD

Unqualified approval of Turkey's request for permission to fortify the Dardanelles was expressed in the official Soviet organ, Isvestia.

Unconfirmed reports at Halifax said the Canadian National steamships Prince Henry and Prince David may be brought back into service for cruises out of New York.

In the Empire Day program May 24, the Nizam of Hyderabad, believed richest man in the world, will talk for the British Broadcasting Corporation.

The British destroyer Scout transported the body of Dr. Leopold von Hoesch, late German ambassador to Britain, from Dover to Wilhelmshaven.

An increase of 13 per cent. was recorded in the total production of Soviet industry during the first three months of 1936 compared with the same period last year.

The Mellon Institute of Industrial Research reported advances in the fight against pneumonia and development of a new type of tuberculin that may aid in diagnosis of tuberculosis.

Deciding it's a bother to unload freight cars at a station, German railroads have experimented in loading the entire car on a motor truck and delivering the whole cargo on the hoof, or wheel.

F. Napier Denison, director of the Dominion meteorological observatory at Gonzales Heights, has retired, compelling more than 37 years in the government meteorological department.

The king has consented to become patron of the National Rifle Association, and the Duke of Gloucester its president. King Edward is continuing the donation of £250 for the king's prize.

Newest Medical Service

A parachute medical service has been organized by a group of 34 surgeons and physicians graduated from the Soviet government parachute school. The doctors will answer urgent calls by plane, descending in parachutes where landing fields are not available. The service has headquarters at the Moscow civil airfield.

The origin of Cambridge University in England is obscure. It probably grew out of a local educational movement during the twelfth century.

RELIEF FROM ECZEMA

A Lady writes: I had Eczema break out on my leg and tried almost everything, but it did no good. Then I tried Mecca and got relief from the itching, and itching. I cannot speak too highly of Mecca.

Jack Miner's Birthday

Famed Naturalist At 71, Counts His Wealth In Friends

Jack Miner celebrated his 71st birthday April 10th. Edgar A. Guest, the Detroit poet, terms him "the best beloved Christian in America"; while Irvin S. Cobb, writer and humorist, says "Jack Miner is the greatest practical naturalist on the planet." An editorial in the "Ottawa Citizen" says: "Not Watt, but a succession of inventors made the steam engine; not Bell, but many electrical experiments made the telephone. Jack Miner, in this sense, has given us the bird sanctuary." In other words, popularized the sanctuary idea.

While his hair is turning somewhat white, otherwise no one can notice the years creeping on him, because he is active and as enthusiastic in his study of bird life as he was twenty years ago.

JACK MINER, NATURALIST

The world knows he is poor financially, and he says: "My biggest asset is my friends throughout the world, and the good health the good Lord has blessed me with. The friends are something money cannot buy. Some men can count their money, but I can't count my friends."

In his birthday interview, he said: "If it were not for children, flowers, birds and music—especially children—I would have no desire to carry on." And his advice to young men was: "Don't work all your life to make a living, but work to live all your life."

When asked what he thought about world affairs, he said: "The hope of the world is more love and the right kind of education, and less bayonet-point compulsion."

Speaking of religion, he said: "There is too much 'churchianity' and not enough Christianity, and the world needs more evangelism and less 'apologetics'."

Everybody knows he never uses tobacco in any form, and never drinks anything stronger than water; but he said to-day, "You cannot judge the size and quality of any man's heart by the smell of his breath."

In closing the interview, he said: "If a man is built of the right material, the more you sit on him the broader it will make him."

"Be sure you're right and then go ahead, because you will be criticized if you do, and you will be criticized if you don't; so, do and be criticized, but to escape criticism, say nothing, do nothing and be nothing!"

MILLION DOLLAR WRIGLEY SIGN STARTS OPERATION

The new Wrigley Spearmint Gum Sign on Times Square, New York City, a million dollar project, largest of its kind in the world, was formally dedicated and put into operation on Saturday evening, March 28th.

The sign occupies the entire block on Broadway from 44th to 45th Street on the east side of Times Square. The new sign is a super-structure on the top of a two story steel and concrete building built especially to bear the tremendous weight of the display. This world's largest spectacular towers ten stories high; the Spearman on the sign has a grin a yard wide. The package of Wrigley's Spearmint is larger than a boxcar.

The sign shows gigantic, multi-

coloured, tropical fish swimming about the sky; the largest fish measures 42 feet from tip to tail. The flashing mechanism consists of 21 pieces of apparatus, all operating in unison, but no one piece is synchronized with another. The electrical current required for this huge display would serve a city of ten thousand. There are 1,084 feet of neon tubing and almost seventy miles of wire used. The investment on the entire project is a cool million dollars.

Hundreds of thousands of people will pass the sign each day; the number who pass daily through the subway at Times Square is estimated to be almost equal to the population of Toronto.

Matched Crochet for Matchless Chic

Household Arts by Alice Brooks

PATTERN 559

Have you seen a smarter pair of matching accessories this Spring? And wouldn't they give your new ensemble that finishing touch you crave? The jaunty, dip-brim hat is quickly crocheted in guimpe, its brim in rib stitch, with the same stitch repeated in the purse flap. A braided cord trims both hat and purse.

In pattern 559 you will find complete instructions for making the set shown; an illustration of it, and of all the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

According to a theory of two English scientists, magnetic storms that interfere with telegraph and cable service are due to a ring of electric current that surrounds the earth like Saturn's rings.

An explorer reports that he has discovered a bean in Southern Asia that grows at an astounding rate. The usual procedure is to place the bean in the ground and then jump clear.

Now Science Explains Why So Many People Past 40

Feel That They're Slipping Losing Their "Grip" on Things

Many people 'round 40 think they're "growing old." They feel tired a lot... "weak." Have headaches, dizziness, stomach upsets.

Well, scientists say the cause of all this, in a great many cases, is simply an acid condition of the stomach. Nothing more.

All you have to do is to neutralize the excess stomach acidity.

When you have one of these acid stomach upsets, take Phillips' Milk of Magnesia after meals and before going to bed. That's all!

Try this. Soon you'll feel like another person! Take either the familiar liquid "PHILLIPS" or the convenient new Phillips' Milk of Magnesia Tablets. Made in Canada.

ALSO IN TABLET FORM: Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. That's all! It is the equivalent of a teaspoonful of the liquid form.

Use Phillips' Milk of Magnesia.

PHILLIPS' Milk of Magnesia

SUNDAY SCHOOL LESSON

APRIL 26

JESUS LOOKS AT WEALTH AND POVERTY

Golden text: The rich and the poor meet together: The Lord is the maker of them all. Proverbs 22:2.

Lesson: Luke 16. Devotional reading: I. John 3:13-18.

Explanations And Comments

The Parable of Dives and Lazarus, Luke 16:19-31. The first two verses of our text has "the most perfect picture of wealth and want that can perhaps be found in any literature." The "certain rich man" we call for convenience, Dives, the Latin word for "a rich man." The extreme luxury in which Dives was living is portrayed by his costly purple outer robe and fine linen undergarment and sumptuous table. The purple robe was of rich material dyed with the liquid obtained from the shell-fish murex. You recall that Lydia, the first convert to Christianity in Europe, was "a seller of purple," Acts 16:14. The fine linen was made from a sort of flax that grew on the banks of the Nile and was so finely woven as to be almost transparent.

Lazarus, the name of the beggar, is a contraction of Eleazar, which means "Help of God," and was perhaps given to him to indicate his character, for there is no more virtue in being poor than there is in being rich. This beggar, covered with loathsome sores, lay at the gate of Dives coveting in vain even the crumbs that fell from the rich man's table, but the only attention he received was from the dogs which roamed the streets as scavengers. These dogs licked his sores and must have increased his misery with their rasping tongues.

In time it came to pass that both Dives and Lazarus died. As someone has observed, Dives doubtless died of overfeeding and overdrinking, just as Lazarus died of undernourishment. The beggar was carried away by the angels into Abraham's bosom. The rich man is found in torment in Hades.

GREAT ACTIVITY IS EVINCED IN MINING INDUSTRY

Ottawa.— Mines Minister Crerar announced completion of 15 preliminary reports based on last year's \$1,000,000 geological survey program and said Canada mining, prospecting and exploration companies this year would be able to send men to the field equipped with a greater wealth of information than ever before.

The coming season, the minister said, promises to be the most active in the history of the Canadian mining industry and it will provide the first opportunity of testing the value of such exploration projects as that launched by the government last year. Those projects sent to the field close to 100 field parties comprising about 1,000 men.

Mr. Crerar said the information gained by the parties "will be a powerful factor in mineral development for many years to come." He emphasized that the reports already available had been rushed and turned out in mimeographed form with provisional maps to be used by prospectors planning an early start of the season.

Other reports are being rushed to completion now. The minister said that "the demand for the reports suggests that the many areas recommended for prospecting will receive considerable attention."

In a resume of the work the minister said the reports detailed work in four areas in Quebec, three in British Columbia, two in Ontario, two in Saskatchewan, and one each in Alberta, Manitoba, Yukon and the Northwest Territories. Many thousands of square miles of favorable prospecting ground, much of which has received little or no attention, have been delimited and vital geological knowledge has been gained on areas now being actively prospected and developed.

A large, readily accessible area in Yukon is defined in one report as practically virgin prospecting territory. Beyond a limited amount of placer gold prospecting, and some more or less incidental prospecting for lode gold deposits, the area has apparently been largely neglected. Approximately one-third of the 10,000 square miles of territory examined in the Yellowknife river region, Northwest Territories, is reported excellent prospecting ground for precious metals.

Advocates Mining Policy

Would Cure Canada's Unemployment Opinion Of Supreme Court Judge
Vancouver.—Mining directly and indirectly could take every able bodied man presently unemployed out of unemployment, Mr. Justice A. M. Manson of the Supreme Court of British Columbia said in an address to the annual meeting of the British Columbia division of the Canadian Manufacturers' Association.

He advocated a Canadian national mining policy and a conjoint policy between the Dominion and the mining provinces—"a policy that will give to those who hazard their money in the development of our natural wealth, and so often lose it, a chance to get their capital back—no taxes for the first years of production."

"Such a policy," continued Mr. Justice Manson, "should stabilize mining taxation for a period of years. It must do that if we are to induce capital from abroad to come to Canada. Mining capital will not venture on a big expenditure knowing that at the very moment it brings a mine to production its margin of profit may be eaten up by increased taxes. Dominion and provincial. Such a policy should fix the rate of taxation so that it will be possible to recover the maximum of low grade ore."

Tenders Accepted

Ottawa.—Finance Minister Dunning announced tenders had been accepted for the full amount of \$25,000,000 Dominion of Canada treasury bills due July 15. The average discount price of the accepted bids was \$99.78138 and the average yield was .879 per cent.

Canada's Resources

Development Of Our Natural Resources Will Set New Pace

Montreal.—Development of Canada's natural resources during the last 25 years of this century will grow more than it has during the past 75, Dr. H. M. Tory, of Ottawa, former president of the University of Alberta and honorary director of the Association of Canadian Clubs, said at the annual meeting of the Women's Canadian Club here.

There was every justification for an optimistic attitude in Canada, he said. The right combination of land and climate had created conditions to make a civilization.

Canada was a large country, communications were easy, centres of population were close at hand, he continued. "The people, the two greatest civilizing and colonizing races in the world combined into one nation, were virile, intelligent and progressive."

The past generations had made a magnificent job of Canada, Dr. Tory said. Mistakes had been made, he admitted. Canada was even now paying the piper for stupidity in early transportation development, but, he said, there never would have been a Canada had it not been for the railways.

Dr. Tory praised the tendency to study national problems. Unity must be maintained, he said, and provincial barriers should be broken down even more than they now are. Canada must take leadership in intellectual movements, he concluded, for an educated people was the foundation of civilization.

Feted By Countryman

Canadian Club Of New York Honors Edward Johnson

New York.—Edward Johnson, manager of the Metropolitan Opera who has concluded his first season with great success, was feted by fellow countrymen at the annual reception and presidents dinner of the Canadian Club of New York.

The club president, Ernest W. Appleby, insisted the honors of the evening be shared by Mr. Johnson. Mr. Johnson told the distinguished company gathered in the club quarters, of his plans to spread "the love of opera" to the masses, through the press and over the air. Another means to this end would be the Met's spring season, opening in May, at prices ranging from 25 cents to \$1 tops.

More Sabotage Suspected

Flywheel Ropes Severed On Machine In Sheffield Factory

London.—The Daily Mail said another case of suspected sabotage in connection with defences was being investigated at Sheffield.

This attempt, the newspaper said, was an effort to sever the ropes of a giant flywheel in the engine room of a factory engaged in the manufacture of steel and wire for aircraft and torpedo boats.

"There is no doubt if the speed of the flywheel were increased without discovery, there would have been terrible havoc," the paper quoted Arthur B. Lee, one of the heads of the manufacturing company as saying. "The whole plant would have been smashed."

Alberta's Fuel Oil Tax

New Act Passed By Legislature Is Effective May 1st

Edmonton.—The new fuel oil tax act passed at the last session of the legislature, under which the provincial government expects to raise \$200,000 additional revenue this year, is to be effective on May 1.

The tax is broadened to cover all lower grades of fuel oil. The tax is seven cents per gallon, with a rebate of six cents when the fuel is used for farming or industrial purposes.

Negotiations Dropped

Calgary.—Negotiations for the sale of the Alberta government telephone system to a United States syndicate have been definitely dropped for a year at least, Hon. W. A. Fallow, provincial minister of public works and telephones, stated here.

PARALYZED PILOT

Although she has never walked since an attack of infantile paralysis at the age of three, Miss Betty Snell, of St. Thomas, Ont., recently won her private pilot's license. Miss Snell, who has to be carried to her plane and lifted into the cockpit, seeks to become a commercial pilot.

Named For Peace Prize

Forty Different Countries Have Suggested Dowager Lady Aberdeen

London.—The Dowager Lady Aberdeen, wife of the former governor-general of Canada, whose name has been put forward as a candidate for the Nobel prize in her capacity as president of the International Council of Women, received the support of women's organizations in all parts of the world from the beginning.

Her name was submitted from 40 different countries where the National Council of Women affiliated to the International Council have, under her guidance, worked steadily in the cause of peace for several years.

Compulsory Subjects

Toronto.—English, social sciences, health education and business practice are to be compulsory subjects under the revised course of study to be introduced soon in Ontario schools, Hon. Duncan McArthur, deputy minister of education, told the public school department of the Ontario Education Association here.

Fears Of Potato Shortage

Crop Report Shows Farm Stocks Lowest Since 1930

Ottawa.—Fears of a potato shortage in Canada appeared well-founded after release of a crop report by the Dominion bureau of statistics.

Lowest since 1930, farm stocks of potatoes at March 31 were 11,047,000 cwt., compared with 19,740,000 cwt. the previous year, the report said. The reductions were general throughout the maritime and eastern provinces. In addition the report said 2,249,700 cwt. or 5.6 per cent. of the 1935 crop were not of merchantable quality. This compared with 2,176,000 cwt. or 5.1 per cent. of the 1934 crop.

Before the bureau report was issued, M. G. McNeely, president of the Prince Edward Island Associated Shippers, said he believed Canada would be faced with an "absolute potato famine before May 1." Prince Edward Island had the "only potato loss in the maritime provinces," he said. New Brunswick's supply had run out as had surplus stocks in other potato growing provinces.

Will Not Consider Plan

British Columbia Not Interested In Creating Provincial Bank

Victoria.—Premier Pattullo of British Columbia arrived home for a brief visit before returning to Ottawa for continuation of negotiations with the Dominion government which were interrupted by the Easter holidays.

The premier, who arrived by aeroplane, said discussions between British Columbia and the federal administration do not concern the receipt of Dominion aid in connection with a \$350,000 bond issue maturing May 15, but rather settlement of general policies. "These policies," he said, include relief, financing and other matters.

"British Columbia has no thought whatever of creating a provincial bank, and has not for a minute considered it," he said in reference to a recent announcement the government of Alberta would suggest co-operation of the coast province with Alberta in establishing such a bank.

Appeal For Medical Aid

London.—The government has turned over to the British Red Cross an urgent appeal from the Ethiopian government for medicine and physicians to treat poison gas casualties. The appeal said more than 1,000 sufferers were in the most acute distress due to the government's lack of knowledge for treatment.

MANY MATTERS CLAIM ATTENTION OF PARLIAMENT

Ottawa.—Interest in parliamentary activities from now to prorogation will be divided among the red and green chambers and the half dozen committees which are faced with heavy agendas and which have not yet really commenced their work.

Radio, railways, pensions, elections, privileges of the house speaker and agriculture are subjects of special committees of the house, and all are expected to ask for permission to sit while the house is sitting, which will mean many empty seats in the green chamber from now on.

Of outstanding public interest will be the committees on railways, radio, pensions and agriculture. Election reform will be dealt with at some length, but no legislation is expected at the present session in view of the fact it is not likely to be needed for some years. Questions of privileges of the speaker during the interim between defeat of a government and election of a new speaker will deal with matters of procedure.

To the railways committee will go a bill to nullify the Canadian National-Canadian Pacific legislation of three years ago under which the board of directors was replaced by a board of three trustees. It is now the intention to restore the director system and the whole question of government railways and their huge annual deficits will probably be threshed out in committee.

Italian People Discontented

Becoming Hostile To Fascist Regime Says Expelled Writer

London.—The Italian people have become increasingly hostile to the Fascist regime, whose war policy, even though victorious, has impoverished the country, Giovanni Giglio, former Rome correspondent for the Daily Herald, declared in that newspaper.

Giglio, who was recently expelled from Italy by Premier Mussolini's government, emphasized the Italian masses, conviction that Il Duce's African adventure is driving them to ruin.

"They understand," Giglio asserted, "that whether war brings them victory or disaster, their country will be completely impoverished and that for the next 20 years at least Italy's exports will be negligible."

The rise in the cost of living has been a large factor in popular discontent, the writer stated.

Caused Much Discussion

Members At Geneva Are Divided Over League Leagues

Geneva.—A move by some of the Latin-American countries to create an all-American League of Nations caused much discussion and sharply divided reaction here.

Some league circles feared this would be the beginning of disintegration of the Geneva institution. Others, however, believed these regional leagues could constructively dovetail into a universal League of Nations.

League officials said they were convinced economic and financial sanctions must be applied universally against any aggressor nation, but they believed these regional groups could liquidate regional conflicts and apply military sanctions in case of necessity.

Wants To Join League

Wellington.—Prime Minister Michael Savage said that New Zealand was endeavoring to secure a seat on the council of the League of Nations in September in succession to Australia. He said that if a New Zealand cabinet minister was then in Europe he would take precedence over the high commissioners as the representative of the island dominion at Geneva.

Apostolic Appointment

Vatican City.—Mgr. Turgeville, apostolic vicar of Hudson Bay, was named superior of the St. Mary Immaculate missionaries working in his vicariate.

The Coronation Chair, made by Walter, the King's painter, at the command of Edward I. (1300-1301), to contain the stone of Scone, brought by the King from Scotland, will be used by King Edward VIII when he is crowned during the Coronation in May 1937. In this chair every Sovereign has been crowned since King Edward II. The famous stone is under the seat of the chair.

Tobert—Link.

A very beautiful wedding took place at the German Baptist church, Camrose on Wednesday, when Miss Martha Link, daughter of Mr and Mrs R Link, Camrose, was united in marriage to Jonathan Tobert, of Spruce Grove.

Mrs Schell of Carbon, sister to the bride, played the wedding march. The groomsmen was Otto Tobert; the bridesmaid was Miss Frances Cink of Oids.

Rev H Schatz, Camrose performed the ceremony, assisted by Rev G W Rutsch of Onoway.

A reception was held in the church basement and dinner was served to almost 200 guests.

Why Baby Smiled.

"Every time the baby looks into my face it smiles," said the New Daddy.

"Well," answered his wife, "it may not be exactly polite, but that shows it has a sense of humor."

DUNNING ASSAILS POOL PROPAGANDA.

Ottawa, March 27.—Annoyance at some of the "propaganda" carried on by the Alberta Wheat Pool was expressed with some vigor by Hon. C. A. Dunning last night.

Referring to an official publication by the Pool to the effect that large payments had been made to "big interests" in connection with the storage and carrying of wheat, the Minister added:

"It is not often that I come to the defence of the Leader of the Opposition, but the fact is that the 'big interests' that got money in connection with the storage policy were the Pools themselves, one of which was making this statement. I have called their attention to it, so I am not saying anything here that I have not said to them. They were referring to what they called instances of feeding big interests and mulcting the farmer, when as a matter of fact the Pools themselves were the largest recipients. That is only natural, because of the extent to which they control the elevator facilities."—(From The Calgary Herald, of March 27th, 1936.

Find Out

From Your Doctor
if the "Pain" Remedy
You Take Is Safe.

Don't Entrust Your
Own or Your Family's
Well-Being to Unknown
Preparations

BEFORE you take any preparation you don't know all about, for the relief of headaches; or the pains of rheumatism, neuritis or neuralgia, ask your doctor what he thinks about it—in comparison with "Aspirin."

We say this because, before the discovery of "Aspirin," most so-called "pain" remedies were advised against by physicians as being bad for the stomach; or, often, for the heart. And the discovery of "Aspirin" largely changed medical practice.

Countless thousands of people who have taken "Aspirin" year in and out without ill effect, have proved that the medical findings about its safety were correct.

Remember this: "Aspirin" is rated among the fastest methods yet discovered for the relief of headaches and all common pains, and is safe for the average person to take regularly.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get
"ASPIRIN"

FLEMING'S FOLLY

— BY —
LAWRENCE A. KEATING

CHAPTER XII.

Half an hour after the irrigation dam workers had concluded to return to their toil, Fleming emerged from the ranch house at sound of a horseman approaching. He recognized Marty Bush, the local cattle agent. Starting to meet him, Link stopped, his attention drawn to the mark of Valle's body still showed.

He picked up the crinkled sheet, smoothed it out, and read in pencilled scrawl: "Keep on the job. We'll run this guy out yet."

Fleming looked up as Bush came closer. "Howdy, Link. Have a customer cigar. Say," he added, noting his friend's scowl, "what yuh got there, a love note without any love?"

Fleming surrendered his find. "Just had a run-in with Gyp Valle when he tried to get my men on strike because I couldn't meet their payroll. Looks to me like Gyp dropped this. What do you think of it?"

The cattle agent read the note, and handed it back looking thoughtful. "Somebody shore put Gyp up to throwin' monkey wrenches in the machinery of buildin' yore dam. But who would it be? Otto Pieper, maybe? You owe Otto considerable money, don't yuh, Link? And in case it came to a sheriff's sale the Stockmen's Bank'd come off first bet."

He pursed his lips as again he studied the writing. "This isn't like Pieper's hand. Besides, I hardly think he would hire a man like Valle to try to crack a sluice gate and get my workers to strike. No,"

he mused, "somebody else is behind Gyp."

"Break a sluice gate, eh?" Bush gave a low whistle. "Well, you'll have to keep your eyes open, Link. Some folks can't get along without pryin' into other folks' business, and I reckon yuh made lots o' enemies, buildin' that dam."

"By the way," he went on, chuckling, "a couple of hours ago I was talkin' to a man in the Trilled Hotel in town, and happened to glance out the window in time to see some different human nature." He winked and nudged his friend. "You and a certain young lady had that sick calf look, standing hand in hand, staring at Jew Lane's jewelry. Ought to buy her a diamond and get married, Link. It's the life!"

Other struck a match for the cigar Bush had tendered him, and expelled a cloud of smoke to snuff the flame. "Marty?" he returned good naturedly. "I've got troubles enough now."

"Yes," Marty started toward the light streak in the foothills that was the Silver Creek Dam. That's what I'm here to talk about, your troubles. Wantin' to ship steers day after tomorrow?"

Fleming led the way back to the ranch house floor where both men rested on a home-made bench.

"Helen and I are short-handed, but we're rounding up everything with horns and a tail. We're depending on you, Marty, to sell it for us."

Bush made no reply for a moment. "I'd like to see you hold your beef another ten days, Link. I've studied the market quite some time now, and it's my judgment yuh'd get more money. Steers for market ain't so plentiful, but it won't be reflected in price till shipments sag—under last year."

"Marty, just between us—and I wouldn't say this to another man in the county—Helen and I have to sell now. We've got to have cash, or else..."

"He gestured significantly. "Him. Heard about her gettin' robbed of the eight hundred? The agent cast a sidelong glance at Link. "Hitt yuh purty hard?"

Fleming nodded. "Look here, Marty proceeded, "I want to see yuh get top price for your beef because yuh really need it so much. Wouldn't like to sell me a hundred acres of that wasteland, would yuh, Link?"

The youth laid a hand on his friend's knee. "Do you believe in the dam?"

"General opinion's against it, yuh know. And I backed out once."

"I wouldn't sell you a hundred acres of solid gold, Marty, unless yuh really had faith in it."

There was a full minute of silence. The cattle agent's cherubic countenance wore a troubled look. Finally he said: "Link, would yuh—ah—like to borrow a couple hundred?"

Fleming was wholly surprised. He happened to know that Marty's diminutive wife, Lenore, had just recovered from a costly illness.

"Thanks," he said with feeling. "I couldn't give security except my steers. I'm keepin' 'em close because I'll need every cent they'll bring. And more, I reckon."

Bush scratched his bulbous nose. He dug inside his catskin jacket, produced a two-inch-thick packet, and tossed it on his host's lap. "Ho hum!" he yawned, rising to stretch wearily. "There's five hundred in small bills. Thought that'd suit yuh best. I got to ride over to Fidge Somers' place to talk beef with him. See lo."

"Marty! Well," Link confessed, exceedingly pleased as he fingered the money, "I guess yuh're crazy. But—oh, shucks!" he exclaimed. "I'm shore obliged!"

"No?"—mockingly. "Link, get me Triple H an' Star Loop beef to Holmes Junction early Thursday mornin', and I'll fix yuh up. Want cash then too, eh? So long, Fleming."

Mr. CAFFEINE-NERVES . . . he does a fade-out!

ing's Folly! See yuh in bankruptcy court."

While he made off on his horse Link stared at the wad of bills in his hand. Grinning, he went at length to the corral where he transferred his saddle to a skittish mount. Half an hour later he left his mansion in a patch of cottonwoods that bordered the heretofore useless valley, and started off on the remainder of the way to the irrigation dam. It was a rocky, rather steep climb even by the well-worn trail over which every pound of material had to be transported. Link walked along feeling the bulge of the money in his pocket, his step considerably lighter than it had been an hour ago.

On a rocky eminence which overlooked the dam and the broad acres to be irrigated, he saw three figures in conference. Jackpot Moll, the gunman, Roper Kilgo, and—yes, it was Gyp Valle.

Link paused. His fingers encountered that anonymous note he had found. On quick impulse he untied his blue neckerchief. This he wrapped about his right hand as if he were injured, then strode casually forward.

"Here comes the guy that talks men into workin' for nothin'!" Kilgo greeted caustically.

Jackpot smiled his dry, reserved smile. "Vaille started heady eyes for a means of escape, but Fleming blocked the only exit. He came on a tolerant look on his tanned face. "Wouldn't put it that way, Roper. The boys know it takes money, and that Helen and I are a little hard pressed right now."

"Yuh'll be harder pressed, an' then not pressed at all!" scoffed the thickest rancher.

He meant that bankruptcy would end the project. Link halted sideways to Moll. "Say, Jackpot, will yuh reach that package out of my pocket? Got my hand between a mare and a corral bar. Jest get that wad of money, will yuh?"

All three stared from Link's hand to his trousers pocket. They exchanged frowns of surprise. "Money!"

"Payroll money, five hundred bucks of it. Oh, by the way," Fleming added carelessly as he accepted the wad from Jackpot, "it wish yuh'd do me a favor, Roper. Write me a note to Marty Bush, since I can't, do it myself with this bad paw."

Kilgo tilted back his sombrero and summoned a friendly look that was not deceiving. "Well—shore, I'll write yore note." He produced a stub of pencil and Link gave him a page out of a pocket notebook. Leaning to use a boulder for a desk, the man looked up inquiringly.

"Write this," Fleming requested. "Dear Marty: I'm bankin' on you to sell those steers Thursday and get me cash instead of a bill of lading, as Miss Hamilton and I have to raise money quick for the dam. I'll meet you at Holmes Junction Thursday mornin' for it. Just sign my name." He ended. "Much obliged."

He turned to go back to the main trail but could not resist one parting shot. "Glad you let me win that ground three years ago, Roper. Yes, sir," he chuckled, "take a good look at the dam and wasteland—you can tell it's going to jump from fifty cents to two hundred an acre!"

A Formidable Weapon

Yokohama Police Decide Inch-Long Gun Is Dangerous

Inspired by American toy pistol which a friend had sent him, Ichiro Endo, a watchmaker at Yokohama, Japan, manufactured an inch-long firearm capable of firing real bullets, and it landed him in the net of the law. Yokohama police have decided the miniature shooting arm is a real gun which could be turned into a formidable weapon. It will kill dogs and penetrate a two-fifths inch board. Endo sold it to a friend for 80 cents and was engaged in turning out a second one when arrested. He said he made the first weapon in four days and loaded it with tiny lead bullets and powder taken from firecrackers.

Little Helps For This Week

Seekest thou great things for thyself? Seek them not, Jeremiah 14:5.

I would not have the restless

That hurries to and fro, Seeking for some great thing to do.

Or some great thing to know; I would be treated as a child, And guided where I go.

Be little and then you will be content with little, be not overwise or over eager in your own willing or desiring, and by degrees come to the knowledge of your Guide who will lead you step by step in the path of life, and teach you to follow. Be still and wait for light and strength. Sink into the sweet and blessed littleness where you live, by grace alone. Contemplate with delight the holiness and goodness of God, which you do not find in yourself. How good it is to be nothing when God is all.

Egypt has prohibited the exportation of animals used for agricultural or transportation purposes.

Gold output of the Transvaal in Africa last year was 10,776,700 ounces.

BACKACHE

IF you have backache, dizzy spells, headaches, do not neglect your kidneys. Take Gin Pills for prompt relief at the first sign of these symptoms. You will feel better, look better—be better, if your kidneys are functioning properly.

Everybody Vote for Pete!

A rumor current a short time ago at Spruce Grove was to the effect that a change was to be made in the personnel of the road maintenance outfit which operates on the Jasper Highway west from the City. In view of this, the friend of Mr. Peter Baron persuaded Pete to apply for one of these positions. He did. Mr. Baron has been a resident of this district for over 40 years, we believe, where he has farmed, and also operated a garage in Stony Plain for a few years.

Despite his admitted age, Pete is still young, handsome and able, and is good yet for many a long year of hard work. He has been in communication with the Department of Public Works, and we understand he has been notified to hold himself in readiness for a call.

Here's hoping Pete's the lucky guy!

Going to Smithfield.

Encouraged by the good support given their entertainment here on the 13th, the S. P. Basketball Girls are planning to go on the road with their show "Ghosts of Carefree Camp." The first place this will be shown will be Smithfield Schoolhouse, near Duffield Corner. Onway and other places will be visited, in turn, if time permits.

It is figured on to put on a dance following the show, as in Stony Plain, and Ursula's Orchestra will play. This orchestra has not been heard in town very often, but they certainly made a good impression on the dancers when they played here the night of the 13th.

The A.T.A.'s "Don't's."

Listing 7 acts specified as unprofessional, a code of conduct for teachers was passed at the annual convention of Alberta Teachers' Assoc'n held in Calgary last week. These are:

- 1—To disregard a contract with a school board
- 2—To criticize adversely a fellow member of the association, or to make an adverse report on his efficiency without first having shown him a written statement and given him an opportunity to reply thereto
- 3—To pass along rumors derogatory to a fellow member of the association whether such rumors be based on fact or not
- 4—To seek professional advancement by other than professional means
- 5—To seek employment with a school board not in good standing with the association or one already having a member of the A.T.A. under contract for the position
- 6—To make known to non-members, except thru authorized channels, the proceedings of a committee or general meeting of the A.T.A.
- 7—To speak to any person, a non-member, in terms derogatory to or derisive of the teaching profession as established by law in 1936.

The Nifty Dispenser.

Young Lady—Mr Long, can you fix up a dose of castor oil so that it won't taste?
Mr Long—Certainly. If you will wait a few minutes I will fix you up. Will you have a drink of soda while you are waiting?

Young Lady—Thank you, yes.

Mr Long disappears behind the partition, to re-appear a few minutes later, and ask, is that all you require?

Young Lady—Yes, thank you. Is it ready?

Mr Long—You have just drank it.

To Build Market Roads.

Hon. W. A. Fallow, Minister of Public Works, has announced that the Provincial Government's highway program this year will include the construction of standard market or secondary roads throughout the Province. The Minister is reported as saying that the Government was trying to encourage farmers in municipalities to improve the market roads by agreeing to maintain the road once it had been built to the standard.

Young Lady—Graciously me!
Mr Long—That was for my mother.

thru offering to assist the municipalities financially.

"If farmers in a municipality will get together and agree on where the road is to be, and build it with screened gravel, the Provincial Government will assist them financially and then maintain the road after it is finished, by sending patrol graders over it to keep it surfaced," said the Minister.

Weak with the Grippe.

Miss Anna Hepko, 10845 98th St. Edmonton, writes—

"I was so weak with the Grippe that it made me quite helpless. A friend told me to try Dr. Martin's Tonic Remedy. And it certainly got me on my feet, and built up my strength. That I wish to let everyone know of this Remedy. How quickly it acts and how reliable it is. Children will take it readily, no mixing or using. It contains no Laxatives or Narcotics. A quick acting tonic that builds up your Vitality. Dr. Emil Martin's valuable remedy for Coughs, Colds and La Grippe. Large bottle, price, 75c., at Hayes Drug Store Stony Plain.

On the Side.

Our Basketball Girls are to be congratulated on the success of their recent entertainment. Thru a vigorous campaign of ticket selling they were able to report the receipt of a handsome sum to start the season with—and this, despite the competition they encountered when their campaign was on.

—The same good story may be related of that other organisation of young people, the Hockey Juniors. Following a season of many games, both here and at outside points, they have a nice sum to the good, and are undecided, as yet whether to donate this sum towards the proposed covered hockey rink, or to throw it into the fund to erect a gym. on College Heights. Here's hoping they do the right thing!

—Those wishing to live long are usually advised by experts to take up a hobby. Well, here's Ted McGinley, the 147 year old gent in Arizona. He has a hobby. Ted's hobby is "going to the saloon." He explains that he walks downtown every week "to get the old wagon oiled."

—Sparkie says: "Don't bark at an Optimist parade! Join it!"

—When the doors of an Ottawa departmental store were thrown open the other morning two ladies made a grand dive for bargains on the shoe counter. Each grabbed a shoe of a one dollar pair and hung on for 2 hours 4 mins, when one lady gave in. While the contest was on, the manager was called, but he was unimpressed and merely remarked "Women were sometimes like that!"

Treating Seed

The conditions of rust and frost that prevailed over large areas of the West have brought about a difficult problem for treating seed against foot rot disease and smut. Certain treatments are better than others. Searle Agents have been supplied with the latest information as to the best treatments for certain qualities of seed. They will cheerfully supply this information free to any farmer. See the nearest Searle Agent.
